

Workflow mapping

While you are there · First week, before configuring anything

Document the patient journey as it actually is, before proposing to change it. Confirm or correct each step on site.

Hospital	Unit / area	Completed by	Date
----------	-------------	--------------	------

1. The patient journey — confirm, correct, or strike out each step

#	Step	Current method (register / logbook / verbal)	Daily volume	Staff involved	Pain point THEY name
1	Registration				
2	Triage				
3	Consultation				
4	Laboratory				
5	Prescription				
6	Pharmacy				
7	Billing				
8	Discharge / admission				
	Other:				

2. The copy chain

Every place a figure is copied from one book into another is where errors enter and time is lost — and where a digital system earns its keep.

Draw or describe the chain from 'a patient walks in' to 'a number appears in a monthly return':

3. The one process that could become digital-only

Which single process could retire its paper register within this deployment, and what has to be true first?
